

TRAINING PROGRAMS

When Life Science organizations partner with UL EduNeering’s Advisory Services, they get first-hand guidance from advisors and consultants that come from the industry. They’ve walked in your shoes and faced the same challenges and opportunities of training, learning and development in a regulated industry. Our optimization sessions are geared to understand your company culture, business, organization, processes, resources and capabilities so that we can guide and navigate you through all aspects of Training Program optimizations, the ComplianceWire® Roadmap and the Learning Maturity Model.

Learning Maturity Model

OPTIMIZATION SESSIONS

ComplianceWire Governance Consultation Workshop (1 day onsite)

UL EduNeering's 1-day (8-hour) Enterprise Governance Workshop provides guidance for clients to create a framework for the configuration, governance and process control for an enterprise LMS, and includes the following activities:

- Review of current LMS governance model, roles, configuration & process
- LMS governance & system configuration best practices
- Workshop to create a high level enterprise LMS governance, configuration and process model
- Written summary and recommendations

ComplianceWire Optimization Workshop (1 to 2 days onsite)

UL EduNeering will provide an on-site Best Practices & System Optimization Workshop, which includes the following activities:

- Review of current LMS governance model, security roles, procedures and work instructions, training processes and training matrix management
- LMS governance & system configuration best practices
- Role-based training matrix creation and management
- Identifying opportunities to gain LMS efficiencies
- Reporting – for LMS management, monitoring, auditing, resource planning, etc.
- Written summary and recommendations
