

EduConnect

DELIVER AND CAPTURE VIRTUAL CLASSROOM EVENTS

For many organizations, virtual instructor-led training needs to be captured as if it were a live face-to-face event, for audit purposes.

The EduConnect tool within the ComplianceWire® learning management system automates the creation and tracking of virtual training events.

With EduConnect, activities are recorded just like a face-to-face instructor-based course within ComplianceWire.

Learners receive individual credit for participating in the event, and audit trails are generated, which eliminates the administrative burden of recording training completions.

Benefits of EduConnect

Dispersed Learners: EduConnect is well-suited for an organization with a dispersed population, such as a sales distribution network that spans the globe, or an organization with manufacturing facilities and vendors that are located on multiple continents.

Live Interaction: EduConnect allows learners to engage with other employees and business partners in a live environment, fostering collaboration, productive Q&A sessions and more.

Sharing Expertise Cost-Effectively: EduConnect enables you to share subject matter expertise without giving up precious time for traveling and incurring large expenses.

Automatically Capture Web-based Classroom Events in a Learner's History

With EduConnect, you simply enter the training event in ComplianceWire as if it were an instructor-led course.

Learners register just as they would for a classroom event. They automatically receive e-mail notifications and the ability to add to a Microsoft Outlook Calendar.

The screenshot shows a web-based registration form titled "Class Information". It includes fields for Class Code (3040586), Start Time (1/28/2012 09:00 AM), and End Time (1/28/2012 10:00 AM). Below this, a message states: "By signing below, you are confirming your request to be registered in this class." The form then has fields for User Name (Smith, Joan), User Id, Password, Reason for Signature (I Confirm), and Signature Comment. To the right of the form, there is a small graphic of three people icons.

All the Power of Adobe Connect, All the Power of Seamless Integration

EduConnect is powered by the leading virtual classroom management tool Adobe Connect, so you gain all of the features of Adobe Connect without having to purchase "seats" for that product.

- Audio streaming and video streaming are both fully supported.
- Text Chat functionality is available for private chats or host chats.
- Voice-Over-IP (VoIP) is supported, enabling audio to stream through computers, potentially saving companies thousands of dollars by eliminating event teleconferencing.
- ComplianceWire enables the instructor of the event to serve as the host, so they gain security rights to upload presentation material into the EduConnect site.
- After the event, learner completions are automatically recorded, reducing the administrative burden of typing in historical completions.

The screenshot shows the "Add Class" form in EduConnect. It includes fields for Title (Process Validation: FDA Guidance for Industry), Class Code (AutoNumber), and Maximum Class Size (40). Below this, there is a Description field (The following IEC session will be held as a virtual), Credit Hours, Fee, Start Date (1/28/12), End Date (1/28/12), Start Time (08:30 AM), End Time (11:03 AM), and Time Zone (UTC+08:00: Kuala Lumpur, Singapore). A note at the top right states: "Required Fields are marked with a red asterisk(*)".

About UL EduNeering

UL EduNeering is a business line within UL Life & Health's Business Unit. UL is a global independent safety science company offering expertise across five key strategic businesses: Life & Health, Product Safety, Environment, Verification Services and Enterprise Services.

UL EduNeering develops technology-driven solutions to help organizations mitigate risks, improve business performance and establish qualification and training programs through a proprietary, cloud-based platform, ComplianceWire®.

For more than 30 years, UL has served corporate and government customers in the Life Science, Health Care, Energy and Industrial sectors. Our global quality and compliance management approach integrates ComplianceWire, training content and advisory services, enabling clients to align learning strategies with their quality and compliance objectives.

Since 1999, under a unique partnership with the FDA's Office of Regulatory Affairs (ORA), UL has provided the online training, documentation tracking and 21 CFR Part 11-validated platform for ORA-U, the FDA's virtual university. Additionally, UL maintains exclusive partnerships with leading regulatory and industry trade organizations, including AdvaMed, the Drug Information Association, the Personal Care Products Council and the Duke Clinical Research Institute.
